

STEAM Kits

- **The Materials:** Assortment of bulk craft, recycled, and art materials, including (but not limited to) coloring utensils, cardboard and different types of paper, rubber bands, clips, glue, tape, pipe cleaners, and other exciting materials to be creative.
- **The Approach:** The kit provides a dozen engineering, art, science, and hands-on challenges. Some examples include tower building, sink and float activities, DIY wearables, and more!
- **The STEAM Kits have been prototyped,** with surveys yielding very positive feedback:

- 90% of users found their experience to be “Excellent”
- 100% of users identified the materials as “fun” and “high quality”
- 95% of users said activities are “exciting”, spending over an hour with the kit.
